

Due date: 10th July 2021

1)

To form a table using tabs and piping sign (|) [shift + backslash] to provide ascii codes of backspace ,horizontal tab, bell and the character 'a'. Use ord()

It should show something like this

Character		Ascii code
Backspace		8
Bell		7
'a'		97

2) Ungraded assignment:

In this assignment what we try is get an error if the input is not an integer while using int() and if it's a integer it should show the integer out.

Error must accompany a bell.

Use if accompanied with isDecimal().
